Our bodies and minds are enigmatically linked to the earth, to the ocean and to each other. When we can reconnect to our bodies and the nature around us, we realign ourselves and restore balance. We yearn to heal and be whole, for a return to the simplicity of self.

Rooted in the connection to the natural world around us, our spa and healing arts treatments draw from the inherent wisdom and curative properties of the ocean, local pine forests, wild flora and indigenous herbs. Following the natural rhythm of the elements, surrounding waters and their unique and complex alchemy, each therapy is crafted to create a space for guests' individual desires for exploration, transformation and harmony through body and mind.

## INFRARED SAUNA

Far-infrared rays penetrate the skin at a subtle pace, assisting the body in moving toxins from within the cells into the interstitial fluid. Improved blood flow, muscle recovery and overall immunity is enhanced without the use of convection or conduction heat. In this calming environment, comfortable temperatures support the lymphatic system and central nervous system to help heal and rejuvenate cellular tissue.

## DRY SAUNA

Traditional dry, therapeutic heat set in a wooden cabin that stimulates circulation and cleansing while decompressing the mind and muscles. The high temperature and dry air enable the body to release toxins without overheating the skin. Temperatures range between 140° and 200°F.

## AROMATIC STEAM ROOM

Warm, high-humidity aromatized vapor envelops the body, seeping through the epidermal tissue and increasing blood flow for internal healing. Hydrate your tissues, open up your lungs and alleviate inflammation at therapeutic temperatures between 100° and 110°F.

## ICE FOUNTAIN

Ice flakes applied directly onto the body as a compress stimulate the skin and awaken the circulatory system. The contrast in temperatures between body and ice reinforces the cardiovascular and immune systems while providing pain relief, muscle healing and reducing inflammation.

## PLUNGE POOLS

Three contrast therapy saltwater pools composed of structured water recreate the natural effects of the ocean and thermal springs. Long revered for its therapeutic and detoxification benefits, contrast water therapy, or alternating between hot, warm and cold water, can boost circulation and help dilate the vascular system.

## EXPERIENCE SHOWER

Water, light, color and sound are the elements of this full-sensory shower experience. Featuring an overhead cascading waterfall and rainfall showerhead, this unique experience has temperature contrasts to help increase circulation and visual LED chromo-therapy to purge tension and stress.
